Dawn Media

Worked as the senior web developer and team lead at Dawn media managing, optimizing, developing and tweaking their primary wordpress based website dawn.com and developing websites for their other publications like Herald and Spider magazines.

- **Oct `09 – Feb `11**

Freelance

Provided both web design and development services along with some consultancy to offshore clients like Creditracks and Magnicode and have also been involved in some local projects.

- **June `08 - Oct `09**

Folio3 (Pvt.) Ltd

Joined as a web developer soon after graduation and had the opportunity of working on several interesting PHP and Drupal based websites.

MAJOR PROJECTS

Glamour Ask a Stylist Ask a stylist is an iPhone application made by Like (a company acquired by Google in August 2010) in collaboration with Glamour magazine and connects users to stylists, allowing them to get feedback on their fashion related queries. My role was to port the backend of the application to cakephp and then to add some features to the existing app.

Al-Safeena Al-Safeena would be an online plus mobile book publishing and reading platform for Islamic books. Currently under development, the service plans to compete with the likes of kobobooks and apples bookstore. My responsibility was to build the prototype.

Prestopublish Prestopublish is an internal project of Magnicode to streamline their project proposal and initial specification gathering process allowing both the parties, client and the service provider to assess where they currently stand. One of the prominent features is layout designing for iPhone applications, which allows them to draw as well as salvage older graphical elements designed by the company by providing them to the clients for usage in their layouts.

Tawkoo Tawkoo is currently under-development. It is a social-website that aims to revolutionize the way users interact and communicate. I have been involved in developing the front-end of the website and adding all the jQuery goodness to it.

Gamezebo Gamezebo is a drupal-based online hub for casual gamers where they can find information on different types of mini flash games. Work involved adding features such as integration of facebook connect, SEO, integration with youtube, spam control using Mollom, user management and blocking, improving content submission workflow etc. Currently involved in the rebuilding and redesigning of the website from scratch including it's database architecture.

TwinStrata TwinStrata is an online purchasing ground and information resource for a software product. Major tasks included revamping the admin panel and integration with paypal.

GreenCardamom Folio3's very own Art Gallery Management System built around the MVC architecture. Work involved tweaking of existing features, fixing of bugs and managing and generating reports.
